

Redesign the Misleading Colored Chart

R.No: 6 Reg. No: 192325016 Name: BANDLAPALLI BHANUTEJA REDDY

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

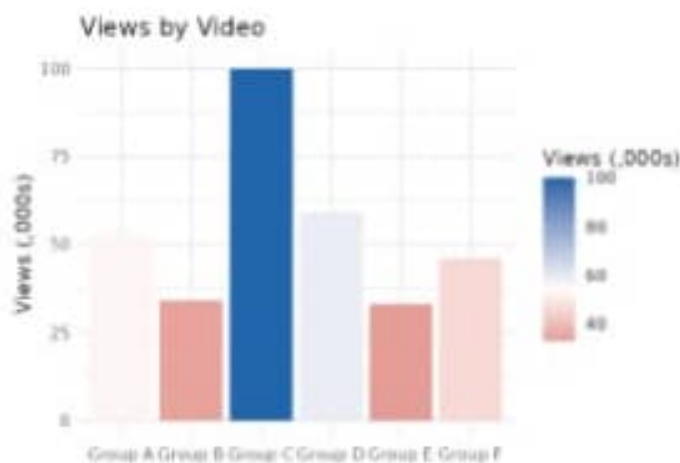

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Name: B. Bharateja Reddy

Reg-No: 192325016

CLASS ACTIVITY

DSA0601.

CHART-1 - PASS vs FAIL BY SECTION

① What is this chart trying to show?

This chart shows the number of students who passed and failed in four different groups.

Group 1, Group 2, Group 3, Group 4.

- * X-axis shows different groups.
- * Y-axis shows no. of students.
- * Green represents students passed.
- * Red represents students failed.
- * Each bar divided into two parts: Fail + Pass.
- * Group 3 has the highest total number of students compared with other groups.

② What's wrong with the color choice?

The chart uses green for Pass and red for Fail.

- * Green usually means good, correct or safe.
- * Red means, bad, wrong or danger.
- * This can make the chart look more dramatic than it needs to be.

③ Propose a better color scheme.

A better choice would be blue for Pass
light gray for Fail.

Pass → Blue

Fail → light gray.

CHART-2

views by video

① What is this Chart trying to show?

This Chart shows number of views received by different videos.

- * X-axis Shows the videos/groups
- * Y-axis Shows the number of views in thousands.
- * The height of each bar represents number of views
- * The taller bar means video received high views
- * Group C is taller bar.

② What's wrong with the color choice?

The chart uses different colors and shades for bars. The colors are also connected to number of views.

- * The main purpose of a bar chart is to compare the height of bars.
- * The same type of information - number of views - does not need many different colors.
- * Some colors are very light, harder to see.

③ Propose a better color scheme.

I would use one color for all the bars.

Ex:-

GROUP A → Blue

GROUP B → Blue

GROUP C → Blue

GROUP D → Blue

GROUP E → Blue

GROUP F → Blue.

Then the height of each bar will clearly show number of views.
