

LAB EXPERIMENT RECORD**29-09-2026---Set 3: Employee Performance Evaluation**

Department	AIML
Course Code / Course Name	DSA0601 / Data Handling and Visualization
Experiment	Data Visualization using R
Name	BANDLAPALLI BHANUTEJA REDDY
Register Number	192325016
Date	01 OCTOBER 2026
Day	Thursday

Aim

To evaluate employee performance using a line chart, bar chart and scatter plot, and to build an interactive Tableau dashboard for exploring the performance data.

Dataset: Employee Performance

Employee ID	Department	Years of Service	Performance Score
1	Sales	5	85
2	HR	3	92
3	Marketing	7	78
4	Sales	4	90
5	HR	2	76

Question 1: Line Chart of Performance Trend

Question: Create a line chart to visualize the performance trend of employees over time. Include a legend and labels.

Aim: To visualize the performance trend of employees using a line chart with a legend and labels.

Result: Performance peaks at 92 for Employee 2, drops to 78 for Employee 3, recovers to 90 for Employee 4, and is lowest at 76 for Employee 5.

Question 2: Bar Chart of Employees by Department

Question: Generate a bar chart showing the distribution of employees across different departments. Label the chart elements.

Aim: To show the distribution of employees across departments using a labelled bar chart.

Result: Sales and HR have 2 employees each, while Marketing has 1 employee.

Question 3: Scatter Plot of Years of Service vs Performance

Question: Build a scatter plot to analyze the correlation between years of service and performance scores. Explain any insights.

Aim: To analyze the correlation between years of service and performance scores using a scatter plot.

Result: The correlation is about -0.17, a very weak negative relationship, so years of service does not clearly predict performance.

Question 4: Interactive Tableau Dashboard

Question: Develop a Tableau dashboard with the line chart and bar chart for interactive exploration.

Aim: To build an interactive Tableau dashboard that combines the line chart and bar chart for exploring performance data.

Result: The dashboard places both charts together, and a department filter lets users explore performance interactively.

Overall Result

Observation: The average performance score was 84.2, with the highest score of 92 achieved by Employee 2 from HR.
