

LAB EXPERIMENT RECORD

01-10-2026--Set 5: Website Analytics

Department	AIML
Course Code / Course Name	DSA0601 / Data Handling and Visualization
Experiment	Data Visualization using R
Name	BANDLAPALLI BHANUTEJA REDDY
Register Number	192325016
Date	01 OCTOBER 2026
Day	Thursday

Aim

To visualize website traffic data using a line chart, bar chart and stacked area chart, and to build an interactive Tableau dashboard for exploring the traffic data.

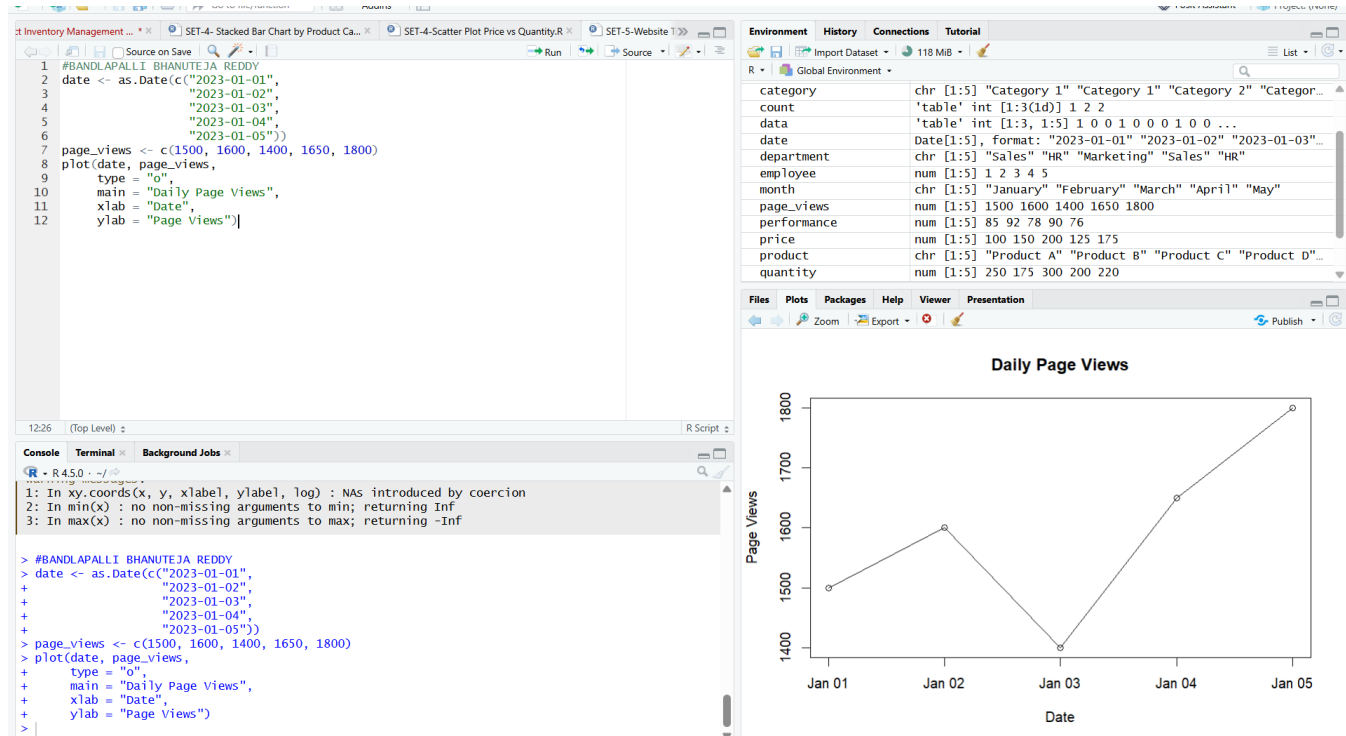

Dataset: Website Traffic

Date	Page Views	Click-through Rate
2023-01-01	1500	2.3%
2023-01-02	1600	2.7%
2023-01-03	1400	2.0%
2023-01-04	1650	2.4%
2023-01-05	1800	2.6%

Question 1: Line Chart of Daily Page Views

Question: Create a line chart to visualize the trend in daily page views over time. Label the axes and title the chart.

Aim: To visualize the trend in daily page views over time using a line chart with labelled axes and a title.

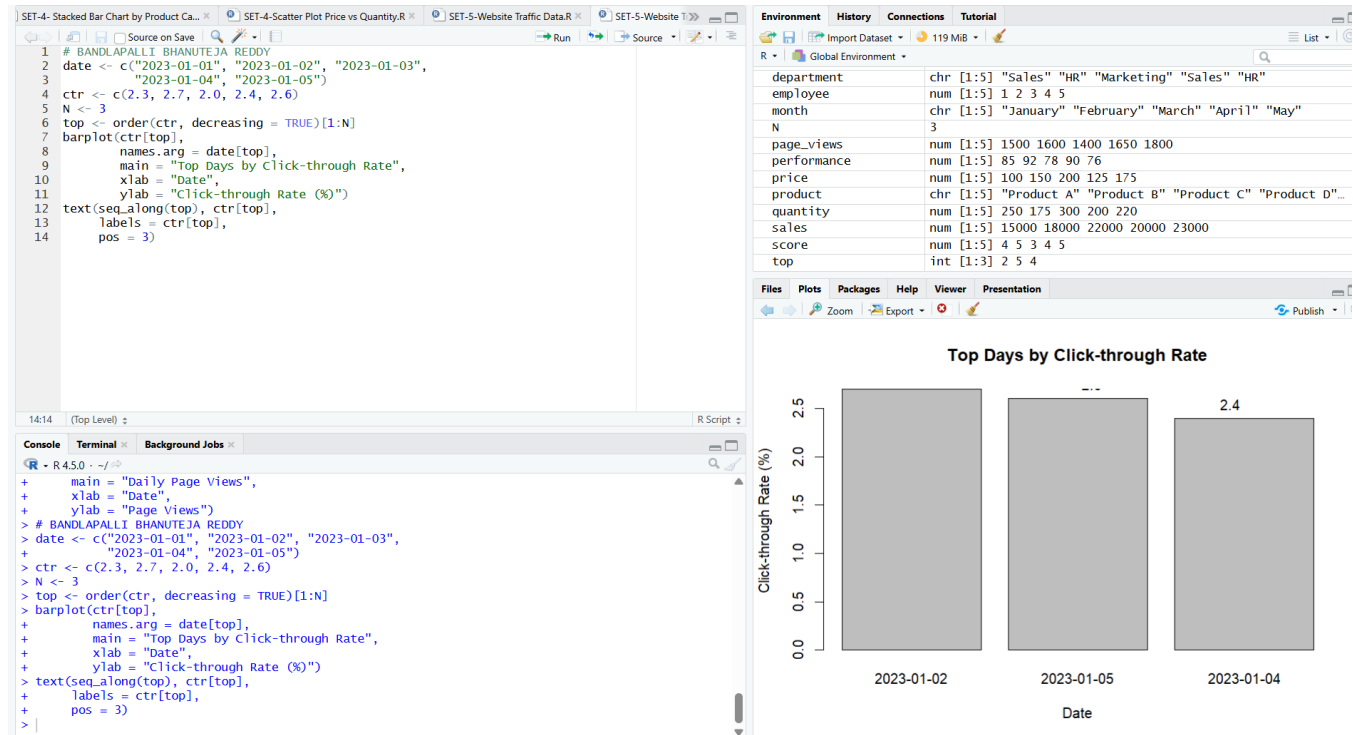

Result: Page views rise from 1500 to a peak of 1800 on 2023-01-05, with one dip to 1400 on 2023-01-03.

Question 2: Bar Chart of Top N Days by Click-through Rate

Question: Generate a bar chart showing the top N days with the highest click-through rates. Label the chart elements.

Aim: To identify the top N days with the highest click-through rates using a labelled bar chart.

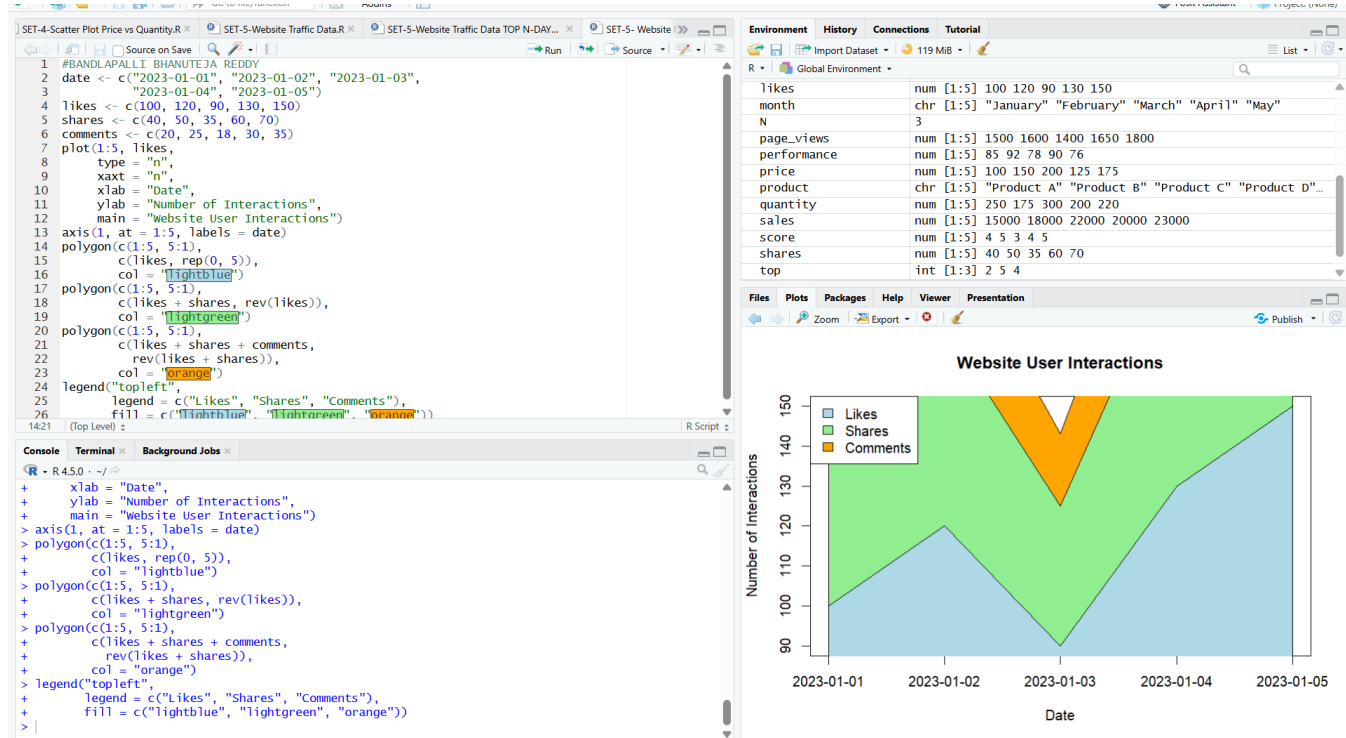

Result: For $N = 3$, 2023-01-02 ranks first (2.7%), followed by 2023-01-05 (2.6%) and 2023-01-04 (2.4%).

Question 3: Stacked Area Chart of User Interactions

Question: Develop a stacked area chart to display the distribution of user interactions (likes, shares, comments) on a website.

Aim: To display the distribution of user interactions (likes, shares and comments) over time using a stacked area chart.

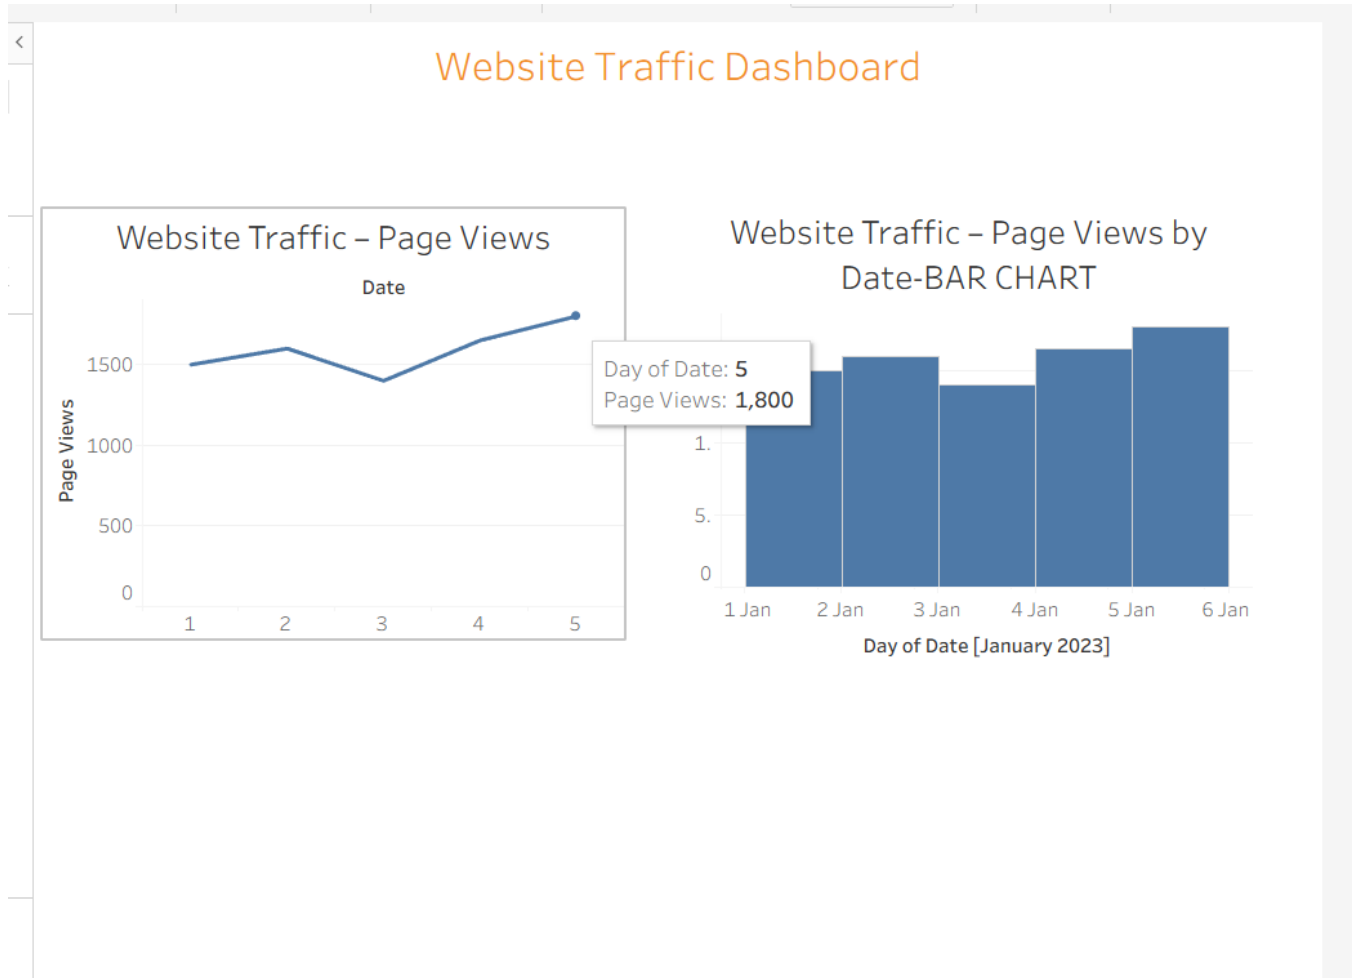

Result: The chart shows how likes, shares and comments add up to total interactions each day; the dataset has no interaction columns, so these values must be supplied.

Question 4: Interactive Tableau Dashboard

Question: Build a Tableau dashboard with the line chart and bar chart for interactive exploration of website traffic data.

Aim: To build an interactive Tableau dashboard that combines the line chart and bar chart for exploring website traffic data.

Result: The dashboard places both charts together, and filters on date let users explore page views and click-through rates interactively.

Overall Result

Observation: Page views grew from 1500 to 1800 over the five days, and the average click-through rate was 2.4%.
